Hospital-Analytics-Dashboard-PowerBI

Hospital Performance Analytics Dashboard built using Power BI. This dashboard provides a complete view of patient visits, revenue, department performance, demographics and city-wise insights. I worked on data cleaning, data modeling, DAX calculations and dashboard designing to deliver actionable insights.

◆ Key Insights from the Dashboard

Orthopedics has the highest patient volume

Viral Infection generates the most revenue

Delhi, Mumbai & Hyderabad are top-performing cities

Visits are high in 18–55 age groups

56+ age group has the highest treatment cost

Male–Female visit ratio remains almost equal
